

Careers Hub 2030: Skills Action Plan

Use the *Skills Builder Ladder* to help you complete this.

	Skills	Post-Event
Skills I Have	<p>Which skills do you already have and how have you developed these skills?</p> <p>The skills that I feel most confident in include listening as I rated myself at step 4 for this and creativity as I rated myself at step 3 for this. I feel confident with the listening skill because we all have to listen at school to be able to learn. I think that I am creative because art is my favourite subject and I like writing adventure stories.</p>	<p>Are there any skills that you did not realise you had until you discussed this sector with employees?</p> <p>I did not realise that I was able to present until we presented to an audience about our employee visitors. We also worked hard together so I have developed in teamwork.</p>
Skills I Need	<p>Which skills will you need for the future? Use the <i>Skills Builder Ladder</i> to help you find what step you are currently at.</p> <p>Skills that I need for the future include aiming high as sometimes I can find work tricky and feel like I want to give up. This also links with problem solving as I don't always enjoy solving problems in Maths. Listening = step 4, presenting = step 2, creativity = step 3, problem solving = step 2, aiming high = step 1, staying positive = step 1, teamwork = step 2, leadership = step 1.</p>	<p>What skills do you now know are necessary for you to develop?</p> <p>I think staying positive is one of the most important skills because it is important in the Environmental Sector to stay positive when people don't always agree with what you are doing, it would be easy to give up at times. I also thinking that aiming high is important as we should always aim to push ourselves.</p>
Action Plan to develop the skills I need for 2030	<p>How can you develop the skills? Who can help you to develop these skills?</p> <p>For the skills of aiming high, I must push myself in every challenge, make sure that I complete all of my work to the highest standard and ask for support to reach my potential.</p>	<p>Are there any other skills you would now like to develop?</p> <p>I think that I need to develop in the skill of problem solving as it is necessary in all jobs in the Environmental Sector as well as many others.</p>
